TED awareness program at Mirkarwada FH

An on board demonstration on the use of Turtle Excluder Devices (TEDs) was conducted with the participation of 25 stakeholders, including trawler owners, fishermen, crew members, and NETFISH officials. Two bottom trawl shrimp trawlers were used—one fitted with a TED and cover net—to assess catch performance. The trial showed minimal catch escapement (1.52%–2.23%) through the TED flap, while the TED-fitted net recorded a higher total catch compared to the non-TED net. The demonstration program was very successful and it highlighted the effectiveness of TEDs in reducing by catch and promoting sustainable fishing practices.
